# Controls & Features of the CYCLONE

## CHANNEL 1:

(Green Led) - Activated by pulling out on the Level 1 knob, or by footswitch). This channel is for all Clean tone applications . For the cleanest sound, set the master 1 level to a higher volume level (around 7 or 8). Level 1 should be set to a lower volume (2 or 3), and increased or decreased for desired volume.

To add some gain to your clean tone, set level 1(8 or 9) to a higher volume & bring down the Master level (2 or 3).

**NOTE: LEVEL 1 KNOB MUST BE PUSHED IN WHEN FOOTSWITCH IS IN USE.**

## CHANNEL 2:

(Red Led) This channel is for all distorted tones. For classic to vintage stile sounds, set the Gain 2 knob to a lower level (1 to 3). Level 2 knob & Master level should than be balanced to find desired volume.

Heavy rock or metal tones are achieved by setting Gain 2 to a higher level(5 to 10), and adjusting the Level 2 and Master level to find the desired volume.

**REFER TO THE SETTING SHEET FOR SOME OF THESE DESIRED TONES.**

## PREAMP Controls:

The CYCLONE features two distinct channels, *Channel 1*(Clean channel only) is controlled with a 3-band Eq. with presence. *Channel 2* (Dirty channel only) is controlled by a 3-band eq. with mid-sweep & 9-band graphic, for all types of tailored sounds.

*Level 1-* (Pull to Activate)Clean channel only, controls level of clean channel volume.

*Level 2 –* Controls volume level of dirty channel

*Gain 2 -* Dirty channel only, Controls amount of distortion level.

*Master level –* Master volume control for both channels(should be set at higher levels than Level 1 or Level 2, for best sound).

*Bass controls -* Adjusts amount of low end frequencies.

*Mid Level-* Adjusts the desired amount of mid frequencies

*Mid Frequency-* Sweepable control, set at desired mid frequency.

*Treble-* Controls amount of high-end frequencies.

*Presence -* Adds extra high-end frequency control to the clean channel.

*9-band-* For use to tailor your sound on Channel 2 only. Recemmeded to boost freqeicies above 0dB. Setting below 0dB, will cut signal & volume.

## EFFECTS:

Your CYCLONE is equipped with a custom set balanced digital reverb, (which can be adjusted to the desired amount, with the reverb knob). Other effects can be added through the effects loop on the rear panel.

## REAR CONTROL FEATURES:

*Speaker outputs-* There are two speaker outputs which will handle 4,8 or 16ohm loads

*Effects loop-* This amp features a stereo send & return, to add on any outboard processors.

*Line-out with Level control -* Balanced line out with level control (signal only). Used for recording, or to use a different power supply.
